

The *Namibian Uranium Institute* cordially invites you to the following Workshop:

Radiation Safety for Managers Course

Presenter: Dr. Detlof von Oertzen (VO Consulting)

A good understanding of radiation safety and potential exposure to radiation is essential for all managers working in the uranium exploration and mining industry.

There are many misconceptions about uranium and radiation, which lead to speculation and unnecessary anxiety if not addressed. Managers should therefore be in the position to assess radiation risks and radiation safety issues to correctly inform their staff.

The Namibian Uranium Institute offers this tailor-made course for managers active in the uranium industry and related industries, to inform and keep them up to date on the most pertinent aspects of radiation safety and applied radiation management.

Friday, 22nd February 2019, 09h00 – 13h00

Namibian Uranium Institute, Swakopmund

- The course fee is NAD 1 495.00 incl. VAT (Minimum of 6 participants)
- Refreshments and light lunch will be served
