

***The Namibian Uranium
Institute cordially invites
you to the following
Workshop:***

Introduction to Radiation and Uranium for members of the public

Presenter: Dr. Detlof von Oertzen

Radiation safety is an issue that many residents of the Erongo Region are concerned about. Often there are misconceptions which lead to speculation and unnecessary anxiety.

This short workshop has been re-designed to be tailor-made for members of the public, who wish to learn more about up-to-date and quality assured radiation information.

After an introduction to background radiation, it covers the different types of radiation, biological effects and radiation safety.

Tuesday, the 26th of November 2019, 18h00 – 19h30

Namibian Uranium Institute, Swakopmund
