

**The *Namibian Uranium*
Institute Online
Radiation Courses:**

Online Radiation Courses

Due to the COVID-19 pandemic and the strict regulations to stem the spread of the pandemic, the Namibian Uranium Institute was unable to offer face-to-face teaching of our radiation safety courses over the past couple of months.

The good news now, is that all courses will be available as online courses as of August 2020. No physical presence will be required at our institute, but the same high quality can be offered via online platforms.

The courses available are:

- Radiation Safety Officer Courses
- Radiation Technician Course (Assistant RSO)
 - Radiation Safety for Managers
- Radiation Safety for Transporters of Radioactive Materials
 - Radiation Safety for Sealed Sources
 - Radiation Safety in Emergency Situations

Please let us know if you are interested in attending any of the above mentioned courses and we are looking forward to being able to cater to our motto again: *Always learning, always improving the way we work*

Please also contact us for any tailor made courses, if required.

Kindly **call Monika or Helena at 064 402 393**, or
send an **email to info@namibianuranium.org**, for any enquiries
